

DSA CORP

DSH CORP

# DSA CORP

We're shaping the future of decentralized communities by giving the community access to knowledge, information, resources, and opportunities to live freely for the full expression of their creativity and personality.

# DSA CORP

## Educate, Distribute Resources, Provide Access and Connectivity across 555 Million web3 users

It is our goal to provide access to the users of the decentralized web by creating educational web3 content, connecting communities, creating software & hardware products

# Problems

Web3 is the future, but there isn't enough **educational content** to help accelerate transition to the web3 space in Africa

The **Decentralized nature of the blockchain** allows for a connection of communities to thrive but there's been a **disconnect between communities**

65% of internet users believe that most Web 3.0 utilities are virtual with no real life application.
